

*It's refreshing to know
that our forests are
increasing, not decreasing.*

Did you know that Tasmania's forests are actually getting larger? While forestry and wood products still drive almost a quarter of the State's manufacturing economy, over the past 10 years our forests have actually increased. Reports from the WWF demonstrate that Australian forests as a whole are being grown at a rate 4.5 times

greater than they are being consumed. Tasmanians can be proud of the efforts made by the New Forest Industry. Not content with being a world leader in forestry and conservation, we are continuing to apply fresh thinking to everything we do. Find out more at www.thenewforestindustry.com.au.
